Ten Thousand Men Could Easily Find

Employment in Windham County.

The farmers of New London and Windham counties find themselves in a predicament at the present time due to the combination of weather and the shortage of labor. The wet weather has damaged the corn seed which had been planted and hundreds which had been planted and hundreds of acres should be replanted but there is not far mhely enough to do it. The dampness has brought up the greatest crop of grass and clover recalled in many years and stretches of land will probably be untouched as there is no help to harvest the hay. To the scarcity of farm labor is added that brought about by the call of President Wilson for mobilization of the militia.

In many of the industrial sections of the county the call for labor is greater than ever before. It has been estimated that 19,000 men could easily and employment in Windham county at the present time.
